

# Angel Osiel Valdez Ramirez

## Full Stack Developer

Passionate developer with 4 years of experience, adept at solving problems and highly focused on details. I thrive on adapting to new challenges and am enthusiastic about projects involving graphical visualization and data handling.

My primary expertise lies within the React ecosystem, including extensive work with TypeScript, Apollo, Hooks and more. Recently, I have expanded my skill set as a Fullstack Developer, working with GraphQL to build robust and scalable applications.

## Work Experience

### Triagons | Full-Stack Developer

May 2023 - Feb 2025

- Developed web applications using React, TypeScript, and Node.js, adhering to best practices for component optimization.
- Contributed to a platform for delivering custom link-in-bio sites, empowering users to centralize links to their music and social profiles for easy sharing
- Utilized styling libraries such as TailwindCSS and StyledComponents for efficient and responsive design.
- Engaged with clients to align product roadmap and priorities, ensuring timely delivery of features.
- Delivered features that significantly improved application performance, user experience and quality of life.
- Collaborated with product and development teams to align on project goals and deliverables.
- Contributed to mobile development with React Native and Apollo GraphQL.
- Worked in an Agile environment, delivering features in sprints.
- Developed and maintained GraphQL APIs with a PostgreSQL database.
- Created GraphQL queries and mutations based on business requirements.
- Implemented a PDF invoice templating system integrated with WhatsApp for automated user notifications.
- Attended English classes to improve communication with international teams.
- Updated Android API level and React Native framework, optimizing app performance, future-proofing the codebase, and enhancing compatibility with the latest platform standards.
- Used Serverless framework to update AWS lambda functions.
- Created a scalable component library to streamline the development of an eCommerce platform, enabling rapid feature implementation and consistent brand styling.
- Implemented unit tests using Jest for key UI components, improving test coverage and enhancing maintainability.
- Integrated Shopify Storefront GraphQL query calls in UI and displayed fetched data in components.

### Technologies and Skills

Scrum

Javascript/HTML/CSS

React.js

Next.js

Typescript

Git

### Courses

**REST APIs with Flask and Python** | Jun 2019

Teclado by Jose Salvatierra

## **Globant** | Web UI Developer

January 2022 - July 2022

- Refactored codebase in order to provide better code readability and make easier development for the future.
- Code review pull requests in the repository
- Scrum; Daily meetings, Sprints, Grooming, Tasks
- Collaborating with teams of frontend and backend
- Constant learning of most used web technologies
- Troubleshooting interface software and debugging application codes.
- Write application interface code using Typescript.
- Enhanced React skills through ongoing upskilling.
- English classes.

## **Samsung SRT** | Software Engineer

August 2019 - January 2022

- Participation in PoC accessibility machine learning project; In charge of backend service for sound inference; Research of dataset and model training
- Provide development and debugging support for other developers from North-America partners on their web applications using Javascript, CSS, HTML and the Samsung Tizen API.
- Supported partners with React-based solutions.
- Contributed developing multiple PoC apps for showcasing to HQ executives.
- Applied accessibility standards to ensure compliance and improve usability.

## **ITEA Technology** | Software Developer Intern

September 2018 - March 2019

- Build an industrial security audits Android application for self use of the client's workers using the Delphi Embarcadero Framework.
- Architect all the features of the app and modeling of the database
- Actively reporting code errors and suggesting improvements for the company's API
- Design UI views

## Education

---

### **Instituto Tecnológico de Ciudad Madero** | Computer Systems Engineering

August 2014 - March 2019

Specialty in High Performance Computing

### **Americano Tampico School** | Technical career in English Language

2011 - 2014
